

INDIA ALLIANCE

"Research funding opportunity: Fellowships from The Wellcome Trust/ DBT India Alliance"

Presentation by

Dr Megha, Programme Manager, & Dr Ajay Pillai, Grants Adviser

Abstract

The Wellcome Trust/ DBT India Alliance is a partnership between The Wellcome Trust (UK) and the Department of Biotechnology (India). Our mandate is to provide research fellowships to the brightest young scientists who wish to pursue research in biomedical sciences in India.

The Fellowships are open to basic science researchers, clinicians and veterinarians. We particularly encourage applications from clinicians and public health researchers. Fellowships are provided at various stages of a research career, typically post-MD/ post-PhD. Clinicians do not require PhD in order to make an application. Exceptions are also made for those who wish to continue with the clinical duties.

Fellows are provided generous personal support and funds for research costs.

At this talk, we will be discussing the schemes, their provisions, the application process and be available post-talk to advice potential applicants.

Date: Thursday, 15 December

Time: 3pm, Department of Psychiatry
